

POLICE

2017 Sunglass Collection: "Halo" models

The new "HALO" models of the 2017 Police Sun Collection epitomise a revolutionary concept. Designed as unisex eyewear, these unique and truly unusual accessories are sure not to go unnoticed.

The innovative flat lenses - this season's trend - are enhanced by a minimalist frame with a futuristic design. This is made possible by a special construction technique, whereby the same material is used both for the lens and for front piece, for an unprecedented blend of transparencies and mirror effects. The only metal features are the slender temples and the profile surrounding the front piece. The "HALO" line comprises three different styles, comprehensive of two sunglasses (Halo 1 and Halo 2) and one optical model (Halo 3), available in six colours each, for a total of 18 styles.

Halo 1 - SPL348 col. 579

A squared model with a metal double bridge. The outer rims, in a silver mirrored lens material, embrace smoky grey lenses.

Halo 2- SPL349 col. 568

Panthos model with a double bridge and Police's iconic DUO LENS for the rims: mirrored blue at the top and dark blue at the bottom. The lenses are also blue.

Halo 3 - VPL399 col. 531

Optical style with a keyhole bridge and a DUO LENS front piece: mirrored silver at the top and dark grey at the bottom.
